

Mega is the best teacher/prof I've ever had. Students are so accustomed to their instructors not expecting their full potential - Dr. Mega pushes people to learn. His instruction is so extremely clear. His methods are great - he puts so much effort into the course - helping students & preparing. His web page is incredible. He is somewhat intimidating to some students but I think that is a lack of confidence on their part.

This class did provide a challenge, but I felt it was well organized and easy to follow.

This was an extremely challenging course but not difficult in one stays on top of thing. I probably could have done much better if I didn't have as many classes this semester. This made it tremendously difficult to stay "on top" of things in this class no matter how hard I tried. Because of this I would have preferred a greater lenancy w/ the homework that 50% 1 day late. It would have benefited me better many times to turn my h/wk in later & understand the assignment rather than flying through with the hints at my side.

I felt that taking the 4th exam isn't a good idea and it is reflected in final. I would have preferred to have been tested on the information before the final so I would have been better prepared for the final - Having six exams all cumulative really cut down on the study time I could have had.

I was very please with every aspect of the course. It was well taught and I learned a great deal. Dr. Mega is an awesome Prof and very helpful during his office hours (which unfortunately, are few and far between!)

Though this class is difficult, Dr. Mega is very thourough & just a good teacher!

Dr. Mega did an outstanding job teaching this course. He explained complex concepts very effectively I have worked my butt off in this course, but I enjoyed it at the same time!

This is the most profound course I have ever had. It was an incredible amount of

Ok, but somehow the prof. kept us going, and it actually became sort of fun. It was unfortunate that I did well in everything, but since I bombed the 3rd Exam, my grade was killed. Anyway, the amount of material I learned surpasses any other class, and Dr. Mega is God's gift to Organic Chemistry. There is no way he could have devoted more time, attention, or instruction to us, and I am grateful for outstanding teachers, such as himself.

This was a very fun class that was very well taught. I learned a lot and the course material was hard but your teaching made it clear!

Dr. Mega is an excellent professor. Organic Chem. is not easy, but he really knows how to explain things well. Sometimes students are shocked or upset because he is very strict on certain matters, but soon they will find he is also very fair. Where he is strict, he is strict with everyone. He is a great person & a great teacher!

Okay I didn't fill in "Strongly Agree" just to kiss butt. Dr. Mega really is a terrific professor and gives up much of his personal time to make material for the course on the web available to use. He has been very flexible to accommodate extra help during his office hours. He has been a greater provider to our class to make sure material was understood. It'll just be a great loss if Dr. Mega is not able to teach next semester.

I didn't think that the daily questions were fair. Some were easier and some more complex than others. I admit that it was challenging and very terrifying, but we should be allowed to make up points. It was a very challenging class as a whole. But thanks for all the extra help. I'm just not all that great in chemistry, but I really did put a lot of effort into this class!

Dr. Mega is an outstanding professor - my favorite yet! I have never looked forward to a class as much as this. Nor have I ever enjoyed a class so much. He exposed me to the amazing world of organic chemistry and I am thoroughly excited.  
Thank You Dr. Mega.

I have never been challenged like this before. I've never learned this much either.
